Why Nobody Believes The Numbers

Why Nobody Believes the Numbers includes 12 case studies of vendors, carriers, and consultants who were apparently playing hooky the day their teacher covered fifth-grade math, as told by an author whose argument style can be so persuasive that he was once able to convince a resort to sell him a timeshare.

Why Nobody Believes the Numbers: Distinguishing Fact from ...

"Why Nobody Believes the Numbers" introduces a unique viewpointto population health outcomes measurement: Results/ROIs should be presented as they are, not aswe wish they would be.

Why Nobody Believes the Numbers by Al Lewis

Why Nobody Believes the Numbers includes 12 case studies of vendors, carriers, and consultants who were apparently playing hooky the day their teacher covered fifth-grade math, as told by an author whose argument style can be so persuasive that he was once able to convince a resort to sell him a timeshare. The book's lesson: no need to believe what your vendor tells you — instead you can estimate your own savings using “ingredients you already have in your kitchen.”

Recorded Books - Why Nobody Believes the Numbers

In the meantime, if you're a buyer or a vendor, I recommend Why Nobody Believes the Numbers for your bookshelf. You'll come away with a better grasp of the good, the bad and the ugly of outcomes measurement, understand what it can and cannot tell us and appreciate the underlying and still evolving debate over the ultimate value of the PHM ...

Why Everybody Should Read "Why Nobody Believes the Numbers ...

"Why nobody believes the numbers" is not an overly serious book filled with industry-speak. But it very much is a valuable text book. With 20 years in health care I've seen a lot of them and this would rank up there with the very best for its reality, simplicity, and relevance.

Amazon.com: Customer reviews: Why Nobody Believes the ...

Why Nobody Believes the Numbers provides information on benefits decisions that can be estimated without math, using observational data to figure out whether you are \"moving the needle\" or not. Better decisions can be made by looking critically at the data and using the information to make smart decisions in the future.

Why nobody believes the numbers : distinguishing fact from ...

The median worker should be making as much as \$102,000 annually—if some \$2.5 trillion wasn't being "reverse distributed" every year away from the working class.

Income inequality: RAND study reveals shocking new numbers

Nvidia's purchase of Arm for \$40 billion would be the largest semiconductor deal of all time by dollar value if it is completed. Arm-designed chips are at the heart of nearly every smartphone sold ...
